

MATTING SERVICES

**WHATEVER YOUR PROJECT
DEMANDS, WHENEVER IT
DEMANDS IT, UNITED RENTALS
IS PROUD TO BE YOUR PARTNER.**

WHO WE ARE

United Rentals recently acquired YAK ACCESS, a complete access company providing temporary access matting, mat installation and removal, construction of aggregate access roads, mechanized clearing, site preparation and grading, and civil services for various construction industries throughout North America. As your total right-of-way access partner, we can help you minimize risks, delays, and costs on your upcoming jobs.

- **Committed to safety**
Safety is our #1 priority
- **One stop for rental and equipment solutions**
Thousands of rental classes and locations
- **Reliable service you can trust**
24/7 rentals, service and support
- **Digital tools to manage productivity**
Get full visibility over your rented and owned fleet

RIGHT-OF-WAY CONSTRUCTION THE *RIGHT* WAY

We offer total access solutions that are safe and efficient. Our clearing and environmental crews are the first on site, clearing rights-of-way and installing erosion and sediment control BMPs to ensure compliance with the Stormwater Pollution Prevention Plan (SWPPP).

Our civil construction crews install construction entrances, fence gaps, culverts, gates, concrete washouts, and any necessary earthwork and grading. Access crews then follow with the installation of temporary matting as well as temporary or permanent aggregate roads, if required.

Following the completion of installation, we provide ongoing site support during construction to move mats, maintain erosion and sediment controls, and other necessary measures. As construction crews progress, our crews remove temporary access and perform restoration and revegetation.

TURNKEY SITE SOLUTIONS

Access Planning & Design

Land Clearing

Site Development & Civil Access

- Grading
- Culverts
- Gates & Fencing
- Construction Entrances
- Laydown Yards
- Gravel Access Roads

Environmental & SWPPP Services

- Erosion and Sediment Control
- SCD Installation and Removal
- Maintenance and Inspections
- Wash Stations

Access Roads & Matting

- Temporary Access Matting
- Wetland Access
- Temporary Bridges
- Aggregate Road Construction

Substation Site Development

- Clearing
- Earthwork Cut/Fill
- Erosion Control
- Drainage
- Gates and Fencing
- Surface Aggregate

Storm Work

- Rapid Response
- Matting
- Crews and Equipment
- Logistics
- Site Support

Restoration

- Grading and Contour Restoration
- Revegetation
- Seeding and Mulching
- Hydroseeding

PARTNERING WITH A COMPLETE ACCESS PROVIDER

Our most successful relationships share a foundation of effective planning and understanding of our partners' long term needs. When partnering with United Rentals, we provide:

- Site Analysis and Evaluation
- Estimating and Project Management
- Access Planning and Design
- Experience Across All Types of Energy Sectors
- Value Engineered Planning
- Project Scheduling

What is an access plan? Do you need one?

An access plan consists of a thorough site evaluation, close study of the project's scope of work, schedule, and evaluation of site conditions to select the right mats, sizes, and systems that will best serve our customer's needs and budget. We use satellite imagery and overlay the access plan to create a graphic representation of the access routes and other considerations to communicate the design to the customer, other contractors, and our crews who are executing the work.

Our access plans are a road map to the most sensible and responsible temporary road access. We do not charge for access plans as they provide a clear understanding of our proposed solution for a safe, temporary roadway.

Do you need one? Typically if your job requires 150 or more mats or is in a sensitive environment, the answer is yes. As always, better safe than sorry.

WHAT PARTNERING WITH A COMPLETE ACCESS PROVIDER LOOKS LIKE

- Regional Mat Fleets
- Dedicated Personnel & Equipment
- Onsite Operations
 - Installation & Removal
 - Erosion Control
 - Site Preparation
 - Cleanup & Restoration
- Logistics
- Execution On Budget and On Schedule
- Commitment to Safety

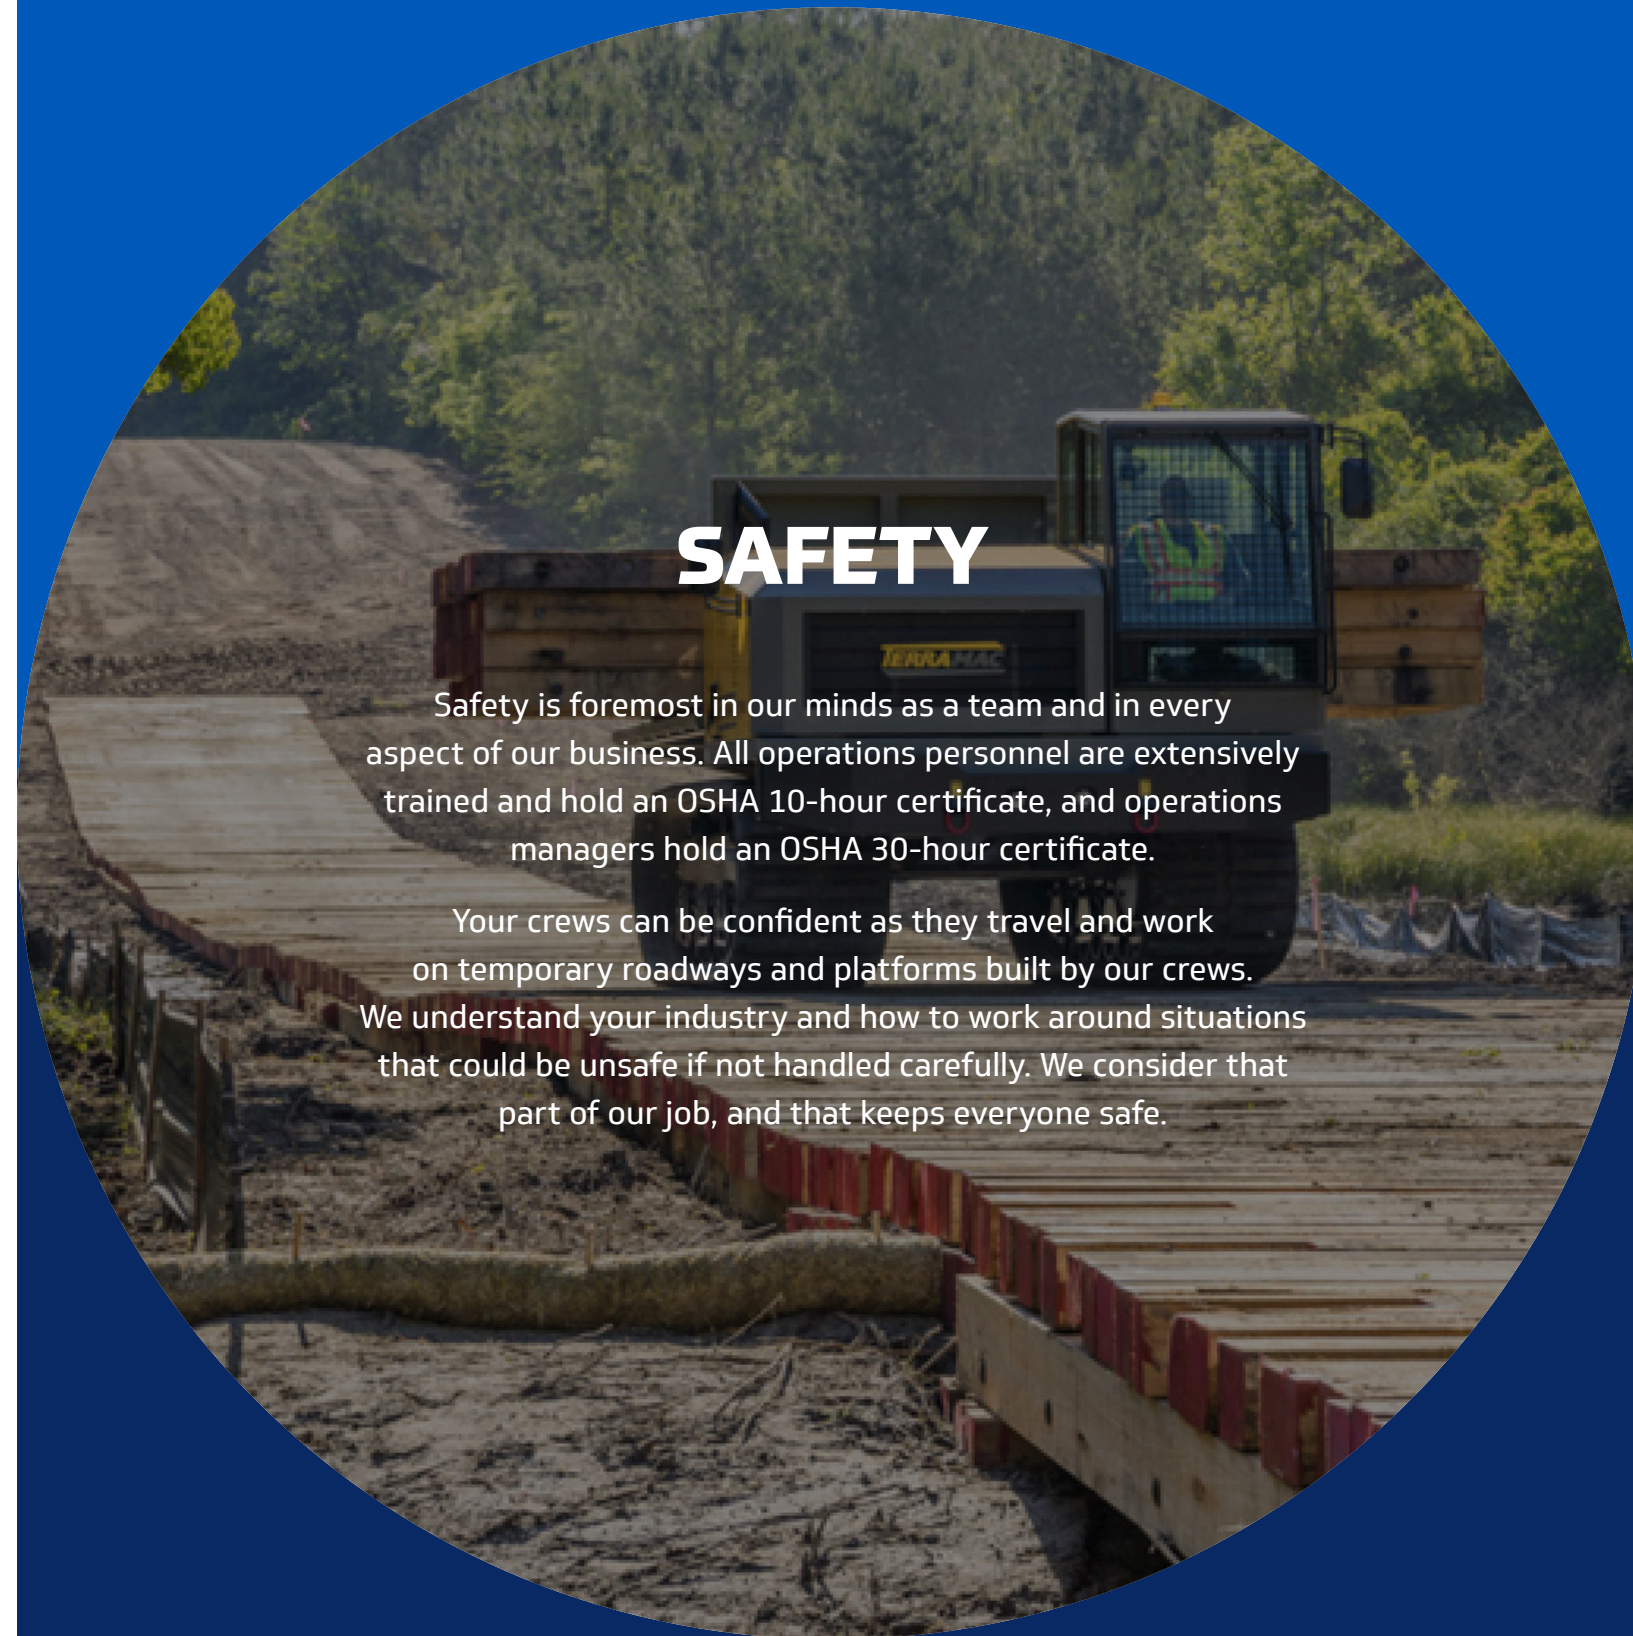

GROUND PROTECTION MATS

We approach temporary access solutions on a job site differently than any other matting or access service provider. Manufacturers' recommendations are centered around their product line while our teams recommend the right mat for the job. We have forged strategic relationships with wood mat mills and top composite manufacturers assembling the 'best in the industry' product supply. We choose the type and size of mat for a project site based on the ground conditions, our customer's scope of work, the equipment being used, and the project schedule. This approach provides our customers with safe access that allows their crews to complete jobs within budget and on schedule.

Our Mats

- 3-Ply Mats
- CLT Mats
- Timber Mats
- Timberlite Mats
- Transition Mats
- Bridge Mats
- Crane Mats
- EPZ Grounding Grates
- Composite Mats
- Track Out Control Mats
- Rig Mats

SAFETY

Safety is foremost in our minds as a team and in every aspect of our business. All operations personnel are extensively trained and hold an OSHA 10-hour certificate, and operations managers hold an OSHA 30-hour certificate.

Your crews can be confident as they travel and work on temporary roadways and platforms built by our crews. We understand your industry and how to work around situations that could be unsafe if not handled carefully. We consider that part of our job, and that keeps everyone safe.

WORK SMARTER WITH DIGITAL TOOLS

With United Rentals' digital worksite performance solutions, you get full visibility and control over your fleet—rented and owned. Our digital tools let you track your equipment, give you actionable insights and allow you to manage your fleet from any connected device. From the office to the field, our digital tools keep teams in the know and in control to minimize downtime and increase productivity.

- **Total Control®**
Right-size your fleet, maximize your impact and streamline your processes with a worksite performance solution configured to your needs.
- **Mobile App**
With its intuitive design, the United Rentals mobile app lets you track equipment and manage rentals — all from your phone.
- **UnitedRentals.com**
Find what you need from a robust catalog of rental equipment, order equipment and schedule delivery to your worksite.
- **Telematics**
Our telematics-enabled fleet delivers the data and insight to help customers manage their worksites more effectively.

**IMPROVE VISIBILITY AND CONTROL OVER
YOUR JOBSITE**

**USE ANALYTICS AND BENCHMARKS TO
IMPROVE EFFICIENCY**

RIGHT-SIZE YOUR FLEET AND OPTIMIZE SPEND

**MANAGE YOUR FLEET WITH PROACTIVE
ALERTS AND NOTIFICATIONS**

**ACCESS YOUR INFORMATION IN THE OFFICE OR
THE FIELD THROUGH INTUITIVE APPS**
