

Get the tools you need to get the job done right.

You're being asked to do more with less. We can help.

Today's workforce challenges require new ways to maintain productivity. With fewer skilled workers on the job, it's critical to minimize downtime. Up to 20% of a worker's day is spent waiting for, looking for or fixing tools and equipment. What if you could get that time back?

Count on United Rentals for onsite Mobile Tool Rooms, custom containers and packages, real-time inventory tracking, and a team of experts to keep your crew working rather than waiting. Our range of available services includes tool pickup, delivery and preventive maintenance, all to help you maximize productivity – and do more with less.

average tool loss and damage on projects

The right tools at the right time – right now.

We're here to help with a wide range of tool solutions custom-fit for your job. From single tools to a fully stocked Mobile Tool Room, our experts will help you plan and track inventory, conduct inspections and provide maintenance to keep your crew productive.

Rent vs. Own

By renting top-quality, well-maintained tools and equipment from United Rentals, you can boost productivity and streamline operations. With onsite availability, you can decrease downtime due to tool failure and lower your rates of loss. Renting also gives you the ability to free up capital and invest in other areas of your business.

Hidden costs of tool ownership

Factoring in purchase cost, depreciation, warehousing, management, testing, certification, maintenance and repair, it is generally more cost-effective to rent rather than own tools.

Rent what you need, when you need it

With United Rentals' extensive inventory of safe, reliable and highly maintained tools and equipment, you can rent exactly what you need, when you need it. Want a single item, a pallet load or custom stocked containers? No problem. We give you the freedom to rent on your own terms – no matter if that's on a weekly or monthly basis.

Tool Solutions Products

Tools

Don't waste time searching for tools. Our experts will recommend the right tools for your project. And then we'll deliver them to the right place, at the right time – so you can keep crews working and productive.

Hoisting and rigging

From manual, electric and air hoists, to winches and rigging hardware, United Rentals can provide a hoisting solution that fits virtually any need.

Hand and Power Tools

Select from a range of tool rentals and eliminate the hassles or cost of ownership.

- Threading Tools
- Conduit Benders
- Cordless Tools
- Sanders and Grinders
- Saws
- Sockets
- Wrenches
- Hydraulic Rams
- Hydraulic Flange Spreaders
- And more

Welding

Whether you need inverters and rectifiers or plasma cutters and fume extractors, we have the right equipment for many types of welding projects:

- Stick Welding (SMAW)
- MIG Welding (GMAW)
- TIG Welding (GTAW)
- Flux Core Welding (FCAW)
- Arc Gouging (CAC-A)

Onsite Tool Packages

From custom-stocked tool pallets to managed onsite tool rooms, our experts will help you determine the right tool solution for your project. When you need to rent multiple tools for extended periods of time, count on us to provide the tools and service you need to get the job done right.

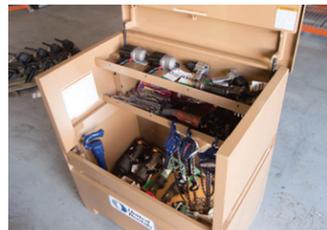

Tool pallets

Pallets of tools can be customized to meet your project needs and ensure you keep your crews working with safe and reliable tools. This option works well for smaller scale projects or scenarios where you need to supplement your current tool process to complete a project.

ProBox

United Rentals' ProBox is a custom-stocked gang box that is delivered to your site. Stocked with tools and supplies specifically for your project, this convenient tool solution is perfect for projects that require a limited range of tools and supplies. It's also a cost-effective solution to supplement your existing tools for job-specific requirements.

Industrial ProBox

- Hoisting
- Power tools
- Pneumatic tools

Construction ProBox

- Hydraulic tools
- Sockets
- Wrenches

Hydraulic Torquing ProBox

- Hydraulic torque wrenches

Mobile Tool Room

Our onsite Mobile Tool Rooms are custom stocked with tools and supplies for your project, and include United Rentals' tracking and management software. Delivered to your jobsite, your Mobile Tool Room is managed by a United Rentals tools expert who checks out tools (via our scanning system) to authorized users, inspects tools upon return, and provides maintenance services and safety oversight.

This onsite tool management is ideal for large projects – improving efficiency, streamlining operations, reducing costs and delivering value. By ensuring tool availability for your crews and maintaining control over inventory, we can help you save money on storage, warehousing, repairs and maintenance.

Hydraulic Torquing

Hydraulic torquing is significantly quieter, lighter weight and more accurate than using pneumatic impact wrenches capable of similar torque output, making it an appealing alternative for many users to the very loud and cumbersome impact of wrenches or torque multipliers which were formerly the only viable option.

- Longest active stroke of all hydraulic torque wrenches
- 24-degree nut turn per stroke due to ratchet assurance device
- Faster than three-moving-part technology
- Ideal for high torque or loosening of highly corroded fasteners
- Ample use of 300,000 psi tensile strength aircraft alloy for durability
- Costs about 20% less than regular and critical path technology
- Better value for general plant maintenance and production

Low Clearance Torquing

- Largest selling slim tool
- Versatile cassette links
- No torque reduction
- Uni-body housing
- Highest strength alloy

Square Drive Torquing

- 360 x 180 dual axis swivel
- 360 adjustable reaction
- No torque reduction
- Uni-body housing
- Highest strength alloy

Safety training and certification when and where you need it.

United Academy® is a comprehensive training solution designed to help you reduce the overall cost and complexity of safety training and credential tracking for your employees. With United Academy courses throughout the U.S. and Canada, you can:
