

8" DIESEL PUMP

IDEAL USAGE

Projects that require transfer of liquids in a range up to 910 m³/h with an optimum of 510 m³/h for a wide range of applications, where no electricity is available

APPLICATIONS

- Pumping waste water containing large solids
- Pumping fluids for the construction industry
- Pumping fluids for municipal and industrial markets

PERFORMANCE

Maximum capacity:	910 m ³ /h, see curve
Best Efficiency Point:	510 m ³ /h @ 20 m
Maximum head:	36 m @1800 RPM, see curve
Suction lift:	8.5 m (max) (water)
Free passage:	76 mm
Maximum pre-pressure:	50 m
Temperature:	0 °C (min) - 90 °C (max)
Sound level:	62 dB(A) at 7 m

PUMP

Impeller:	Semi-open
Priming system:	Mechanically Driven Diaphragm Style Vacuum Pump
Capacity vacuum system:	85 m ³ /h

WEIGHT AND MEASURES

Weight:	2,130 kg (dry weight) 2,500 kg (wet weight)
Length:	3,050 mm
Width:	1,250 mm
Height:	2,000 mm
Connections:	8" ANSI 150# suction side (x1) 8" ANSI 150# discharge side (x1)

MATERIAL

Pump housing:	Ductile Iron (ASTM A536 65-45-12)
Impeller:	Stainless steel (CA6NM SS)
Gaskets & seals:	Fibre Gaskets / Viton O-Rings
Mechanical seal:	Tungsten carbide vs. silicon carbide seal faces, FKM elastomers
Non return valve	Viton ball
Fuel tank:	Carbon steel
Canopy:	Carbon steel painted - Bund carbon steel Hot Dip galvanized

ENGINE

Engine make / model:	Perkins 403J-E22TA
Emission standard:	EU Stage V
Motorpower / RPM:	44.7 kW / 1,800 RPM
Engine speed:	1400 - 1800 RPM (frequency controlled)
Fuel tank:	430 litres (bunded)
Fuel consumption:	11.18 l/h (max)
Run time:	38 hours at 1,800 RPM
External fuel connections:	1/2" ISO A'type QRC

FEATURES

Level control:	Yes, 10 m float switch
Controller:	Deep Sea E100
Lifting:	Certified single point lifting bale and forklift pockets
Transducers/Pressure gauges:	Transducers
Digital fuel sensor:	Yes
Telemetry:	Full control & remote monitoring with alerts

QUALITY AND SAFETY

- Reduced emissions by EU Stage V engine
- Emergency stop switch
- Fully bunded
- QMS inspections completed before every rental

CURVE
